T1069	Check Privacy policy in the account settings		

Statistic:

Diagram of the results of test cases execution:

The following bugs were found during testing:

Minor	At the footer of https://monica.alef.dev/terms_and_conditions.htm l there is incorrect icon of x.com
Minor	The open tablet keyboard partially overlaps important and informativ icons and blue botton while creating task or checklist
Minor	"Duplicate to personal" botton doesn't appear everytime adding the same checklist you have already used

Minor	After exploring task which located on the bottom of the screen the description and details of the task does not appear on the screen
Major	The botton "Generate with AI" not active while creating checklist meanwhile activated PRO plan
Major	The button "Delete profile" in account settings doesn't work

Bugs Severity Statistic:

Major	Minor	Tot
bugs	Bugs	al
2	4	6

Conclusion

94% of tests passed successfully. But there is major bug "Delete profile" what can negatively impact user experience. So I can't recommend this application to release.

Recommendations

I also recommend to fix major bugs as soon as possible (the inactive "Generate with AI" button and the non-functional "Delete profile" button). These issues directly hinder the core functionalities of the app.

Also fix the identified usability bugs, such as the overlapping keyboard and inconsistent "Duplicate to personal" button behavior. These issues may not block essential functionalities but can still negatively impact user experience.
